Understanding charts Desktop

1 Click "Charts" for more options and tools

The "Charts" menu options contain several tools and options to augment your trading charts. "Grid" allows you to toggle on and off the grid background. "Volume" allows you to toggle on and off the daily volume indicators at the bottom of a chart. "Line Chart" switches the chart to from a bar chart to a line chart.

Candlesticks

A Candlestick chart displays the high, low, opening and closing prices of a CFD for a specific period. The wide part of the candlestick is called the "real body" and indicates whether the closing price was higher or lower than the previous opening price. Black/Red indicates that the stock closed lower and White/Green indicates that the stock closed higher.

A style of chart that is created by connecting a series of data points together with a line. This is the most basic type of chart used in finance and it is generally created by connecting a series of past prices together with a line.

Bar Chart Bar Chart

A bar chart is a style of chart used by some technical analysts on which the top of the vertical line indicates the highest price a security is traded at during the day, and the bottom represents the lowest price.
